

Reading List for Psychology (2026-27)

The following are suggested readings which may differ from the suggestions made by other colleges.

- Goldstein EB, Brockmole JR (2017) *Sensation and Perception*. 10th edition. Cengage. [E-book accessible via Bodleian Library.]
- Hogg, M., & Vaughan, W. (Eds.) (2022), *Social Psychology* (9th edition, earlier editions are fine). Wiley.
- Howell, D. C. (2012). *Statistical methods for psychology*. Cengage Learning.
- Slater, A. & Bremner, J. G. (2017). *An introduction to developmental psychology* (3rd edition, earlier editions are fine). Wiley.

Please note that for each of the readings, older editions are fine to consult. In each textbook, please consult the first three chapters which, in each case, give you a good overview of the individual subjects.

Students will be sent separate instructions from their Statistics Instructors closer to the beginning of term.
